

Bio301D On-line Quiz 3 (a comic strip on a rat experiment)

For this quiz, you should look at the link below that is a short summary of 1970s studies done on rats and addiction. There will be 4 multiple choice questions, some on models, but some more general.

Some points about this assignment.

- 1) Go over the article before you start the quiz. You have 120 minutes to complete the quiz from the time you access the first question. I have been told that you can log out and log back in, but the timer starts and continues going from the time you start your first question. So once 90 minutes has expired from the time you start your first question, you will no longer be able to submit answers.
- 2) You are free to answer the questions while looking at the links. I have been told that you can move between questions without answering them, but once you answer a question and move on, you will not be allowed to change your answer.
- 3) You are expected to answer the questions on your own.
- 4) You won't know if you answered correctly until after the due date. You should not see a score before then.
- 5) The due date is **11 PM on Wednesday, 9 October**.
- 6) The quiz is on the QUEST site (login with EID): <https://quest.cns.utexas.edu/>
