

Bio301D On-line Canvas Quiz 1 (Scientific Method)

For this quiz, you should look at a short video (~ 4 min) on a new method of having eyewitnesses generate facial sketches for law enforcement. There will be 3 multiple choice questions about that video, the context is the Scientific Method and Data.

Some points about this assignment.

- 1) You are free to answer the questions while looking at the links. It will probably work best if you watch/read first, then go back to the links while trying to answer.
- 2) You are expected to answer them on your own.
- 3) You won't know if you answered correctly until after the due date. You should not see a score or be allowed retries.
- 4) When you log out, the system will not permit you back in. So answer everything before logging out.
- 5) The quiz and due date are on Canvas
