

Bio301D On-line Canvas Quiz 2 (Scientific Method)

For this quiz, you should look at a short video (~ 3 min), in which someone describes the scientific method. There will be one multiple choice question about that video, and it asks whether he says something that does not fit with the class view of the scientific method.

There is also a link to an article on the types of praise that are effective for motivating young kids to perform well. Please read that and then answer 4 questions about it. (Make sure you start on page 1 – the browser may not go to that page automatically.)

Some points about this assignment.

- 1) You are free to answer the questions while looking at the links. It will probably work best if you watch/read first, then go back to the links while trying to answer.
- 2) You are expected to answer them on your own.
- 3) You won't know if you answered correctly until after the due date. You should not see a score or be allowed retries.
- 4) When you log out, the system will not permit you back in. So answer everything before logging out.
- 5) The quiz and due date are on Canvas
